

The Navigation Tree

The Navigation Tree, located in the left hand pane, represents all pages within your web site and is similar to a site map. Here, you can manage your site's navigation.

The screenshot displays the QuantumCMS 4.1 dashboard for Smith & Smith, LLC. The navigation tree on the left lists various site pages such as Home, News, About Us, Professionals, Contact Us, Page Types, Extranet, Site Map, Accessibility Statement, Terms & Conditions, Search, Unavailable, Document Packet Manager, Document Packet User Registration, Document Packet User Login, Document Packet User Forgot Password, Document Packet User Change Password, Table of Contents, Document Packet Help, and iPad created page. The main dashboard area is titled 'Dashboard' and includes a search bar for pages. It features four panels: 'Recent Drafts' with a table of draft pages, 'Recently Edited Pages' showing a list of edited pages, 'Recently Added Pages' listing newly added content, and 'Recent Discussions' with a list of recent forum posts.

Features:

- **Expand and Collapse:** Click the **Plus** and **Minus** icons to expand and collapse sections of the tree.
- **Tool-tips:** Hold your cursor over the name of a page to display a “tool-tip” containing information about that page including the page address, whether or not the page is published and set to appear in the navigation, and the page’s unique ident.
- **Page Type Icons:** The icon next to a page name indicates the page’s type (such as Document, Redirection, Shared, or Form).
- **Unpublished Icons:** When a page is unpublished, a grayed out icon will be displayed instead of the standard page icons.
- **Sorting:** Use the sort arrows in the toolbar above the Tree to adjust where pages appear in the navigation order. Please note: changes will be reflected immediately on the public web site.
