

## Editing Site Details

In order to access the site details, click the Settings link in the top navigation and select “Site Configuration” from the menu.

## Site Details Overview

Under the *Details* tab you may enter important data about the web site. Each of the labels contains helpful text. Hold your cursor over the label for tips on how to enter appropriate content.

**Name**

This is a unique, internal name for the site.

**Title**

This is the title of the site and will be displayed in the browser's title bar.

**Description**

This is a brief description of the site and will appear as the Meta Description for any page without its own Meta Description or *Summary*.

**Title Prefix**

This will appear before the *Title* in the browser's title bar.

**Title Suffix**

This will appear after the *Title* in the browser's title bar.

**Custom Documentation URL**

This field contains the location of custom documentation for the site.

**Breadcrumb Separator**

This field contains the character that will separate items in the breadcrumb navigation on the public web site.

**Default Device**

This sets the default browser type for which the site is designed.

**Default Template**

This sets the default template to use when a new page is created.

**Searchable**

Check this box to enable the full site search.

**Site Published**

Check this box to make the web site available to public users. Please note: if this is unchecked, users will NOT be able to view the public web site.

**Debug Mode**

Check this box to enable debug functions. For production web sites, the recommended setting is unchecked.

**Allow Cache**

Check this box to allow the site to use browser caching to optimize site performance. Please note: some users may see outdated content until his or her browser cache expires.

## Marketing Details Overview

The screenshot displays the QuantumCMS interface for 'Smith & Smith, LLC'. The top navigation bar includes 'DASHBOARD', 'SETTINGS', 'REPORTS', 'COMMERCE', 'ADMIN', 'HELP', and 'LOG OUT'. The left sidebar shows a tree view of site pages under 'Site', 'Files', and 'Modules'. The main 'Site' panel has tabs for 'Details', 'Marketing', 'File Locations', 'Pages', 'Head HTML', 'Site Header HTML', and 'Footer HTML'. The 'Marketing' tab is selected, showing 'Meta Keywords' with 'Prefix Keywords' and 'Suffix Keywords' (containing 'QuantumCMS') input fields. An 'Advanced' button is located below the 'Suffix Keywords' field. Below this is the 'Google Analytics' section with a 'Tracking Code' field containing 'UA-4678795-19'.

### **Prefix Keywords**

The content in this field will appear in the Meta Keywords tag on each page before any keywords assigned on the page level.

### **Suffix Keywords**

The content in this field will appear in the Meta Keywords tag on each page after any keywords assigned on the page level.

### **Custom Meta Tags**

You may add additional Meta tags to the site by clicking the **Advanced** button. Please see our "Custom Meta Tags" post on the QuantumCMS Community for more information.

### **Google Analytics Tracking Code**

Google Analytics is a free web traffic reporting tool that allows you to track a variety of information about your web site's visitors. If you already have an account, you may insert your tracking code into this field and the necessary HTML code will be added to the site to allow Google to gather user data. Please see our "Adding Google Analytics to Your Site" post on the QuantumCMS Community for more information.
